INTABIOTECH

Intabiotech: biotechnology that turns ingredients into results

Science-led ingredients · Integrated supply

For international distributors and commercial partners

THE INTEGRATED MODEL

A vertically integrated biotech partner

R&D+i and Sourcing & Supply under one model, from molecule to shipment.

Research to supply

Ingredient development and commercial delivery share one partner.

Rooted in Spain

Registered office in Paterna (Valencia); industrial facility in Narón (A Coruña), Spain.

Licensed commercial company of The ND Pharma & Biotech Co.

SCALE AND CAPABILITIES

Intabiotech in numbers

50+

Countries served

International shipments connect the portfolio to customers worldwide.

310,800+

Chemical and molecular references

A broad portfolio for diverse application needs.

8

Senior leaders

Across R&D, supply chain, quality and commercial.

2 - 6

Sites in Spain - Plants Operated

Barcelona, Valencia, A Coruña and Pontevedra.

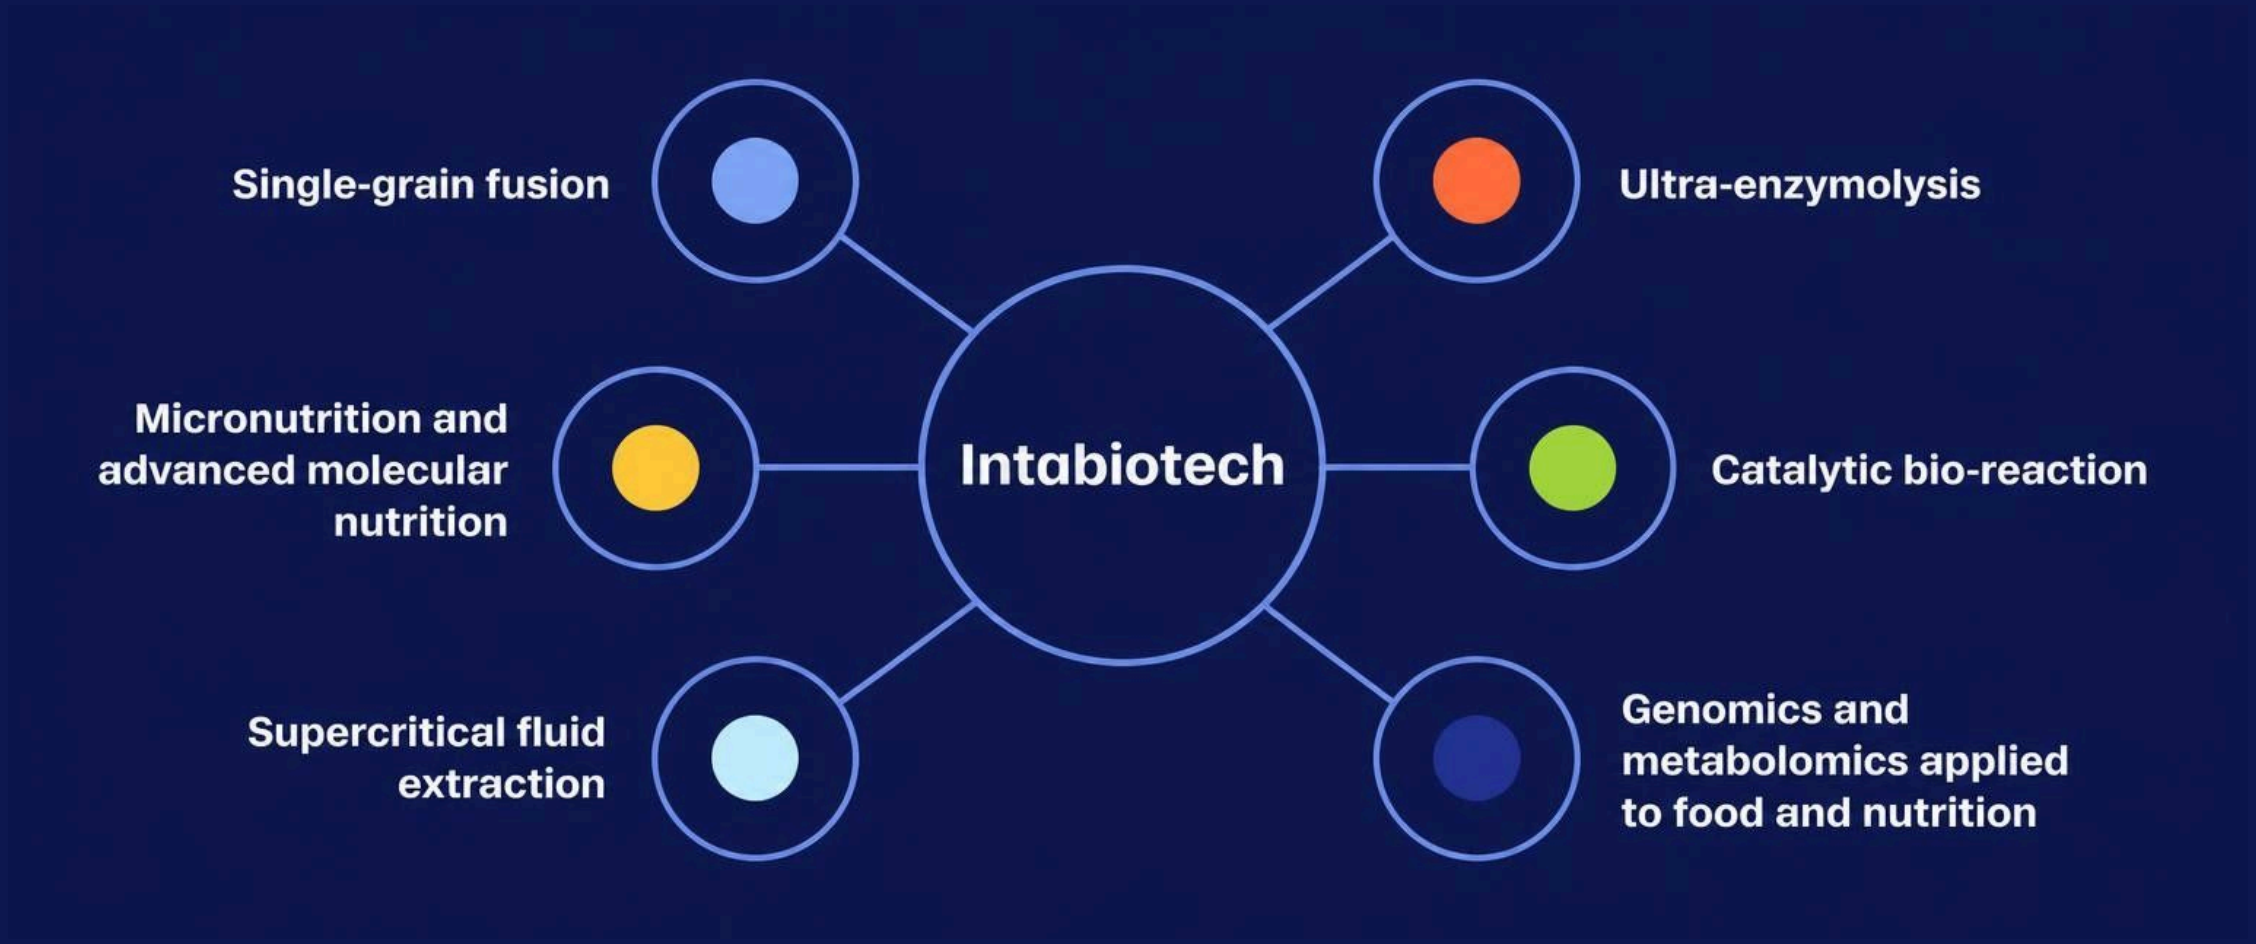

SCIENTIFIC PLATFORM

Technology

Molecular science, ingredient development and validation.

SCIENTIFIC PLATFORM

Six core technologies power every solution

DEVELOPMENT PATHWAY

From concept to validated ingredient

01 Ingredient concept design

Define the ingredient around the application challenge.

02 Formulation and repositioning

Develop the formulation and refine its intended role.

03 Lab validation

Microbiology, pilot studies, in silico and in vivo testing under contract.

04 Manufacturing and supply

Connect development with commercial delivery.

05 Regulatory and quality documentation

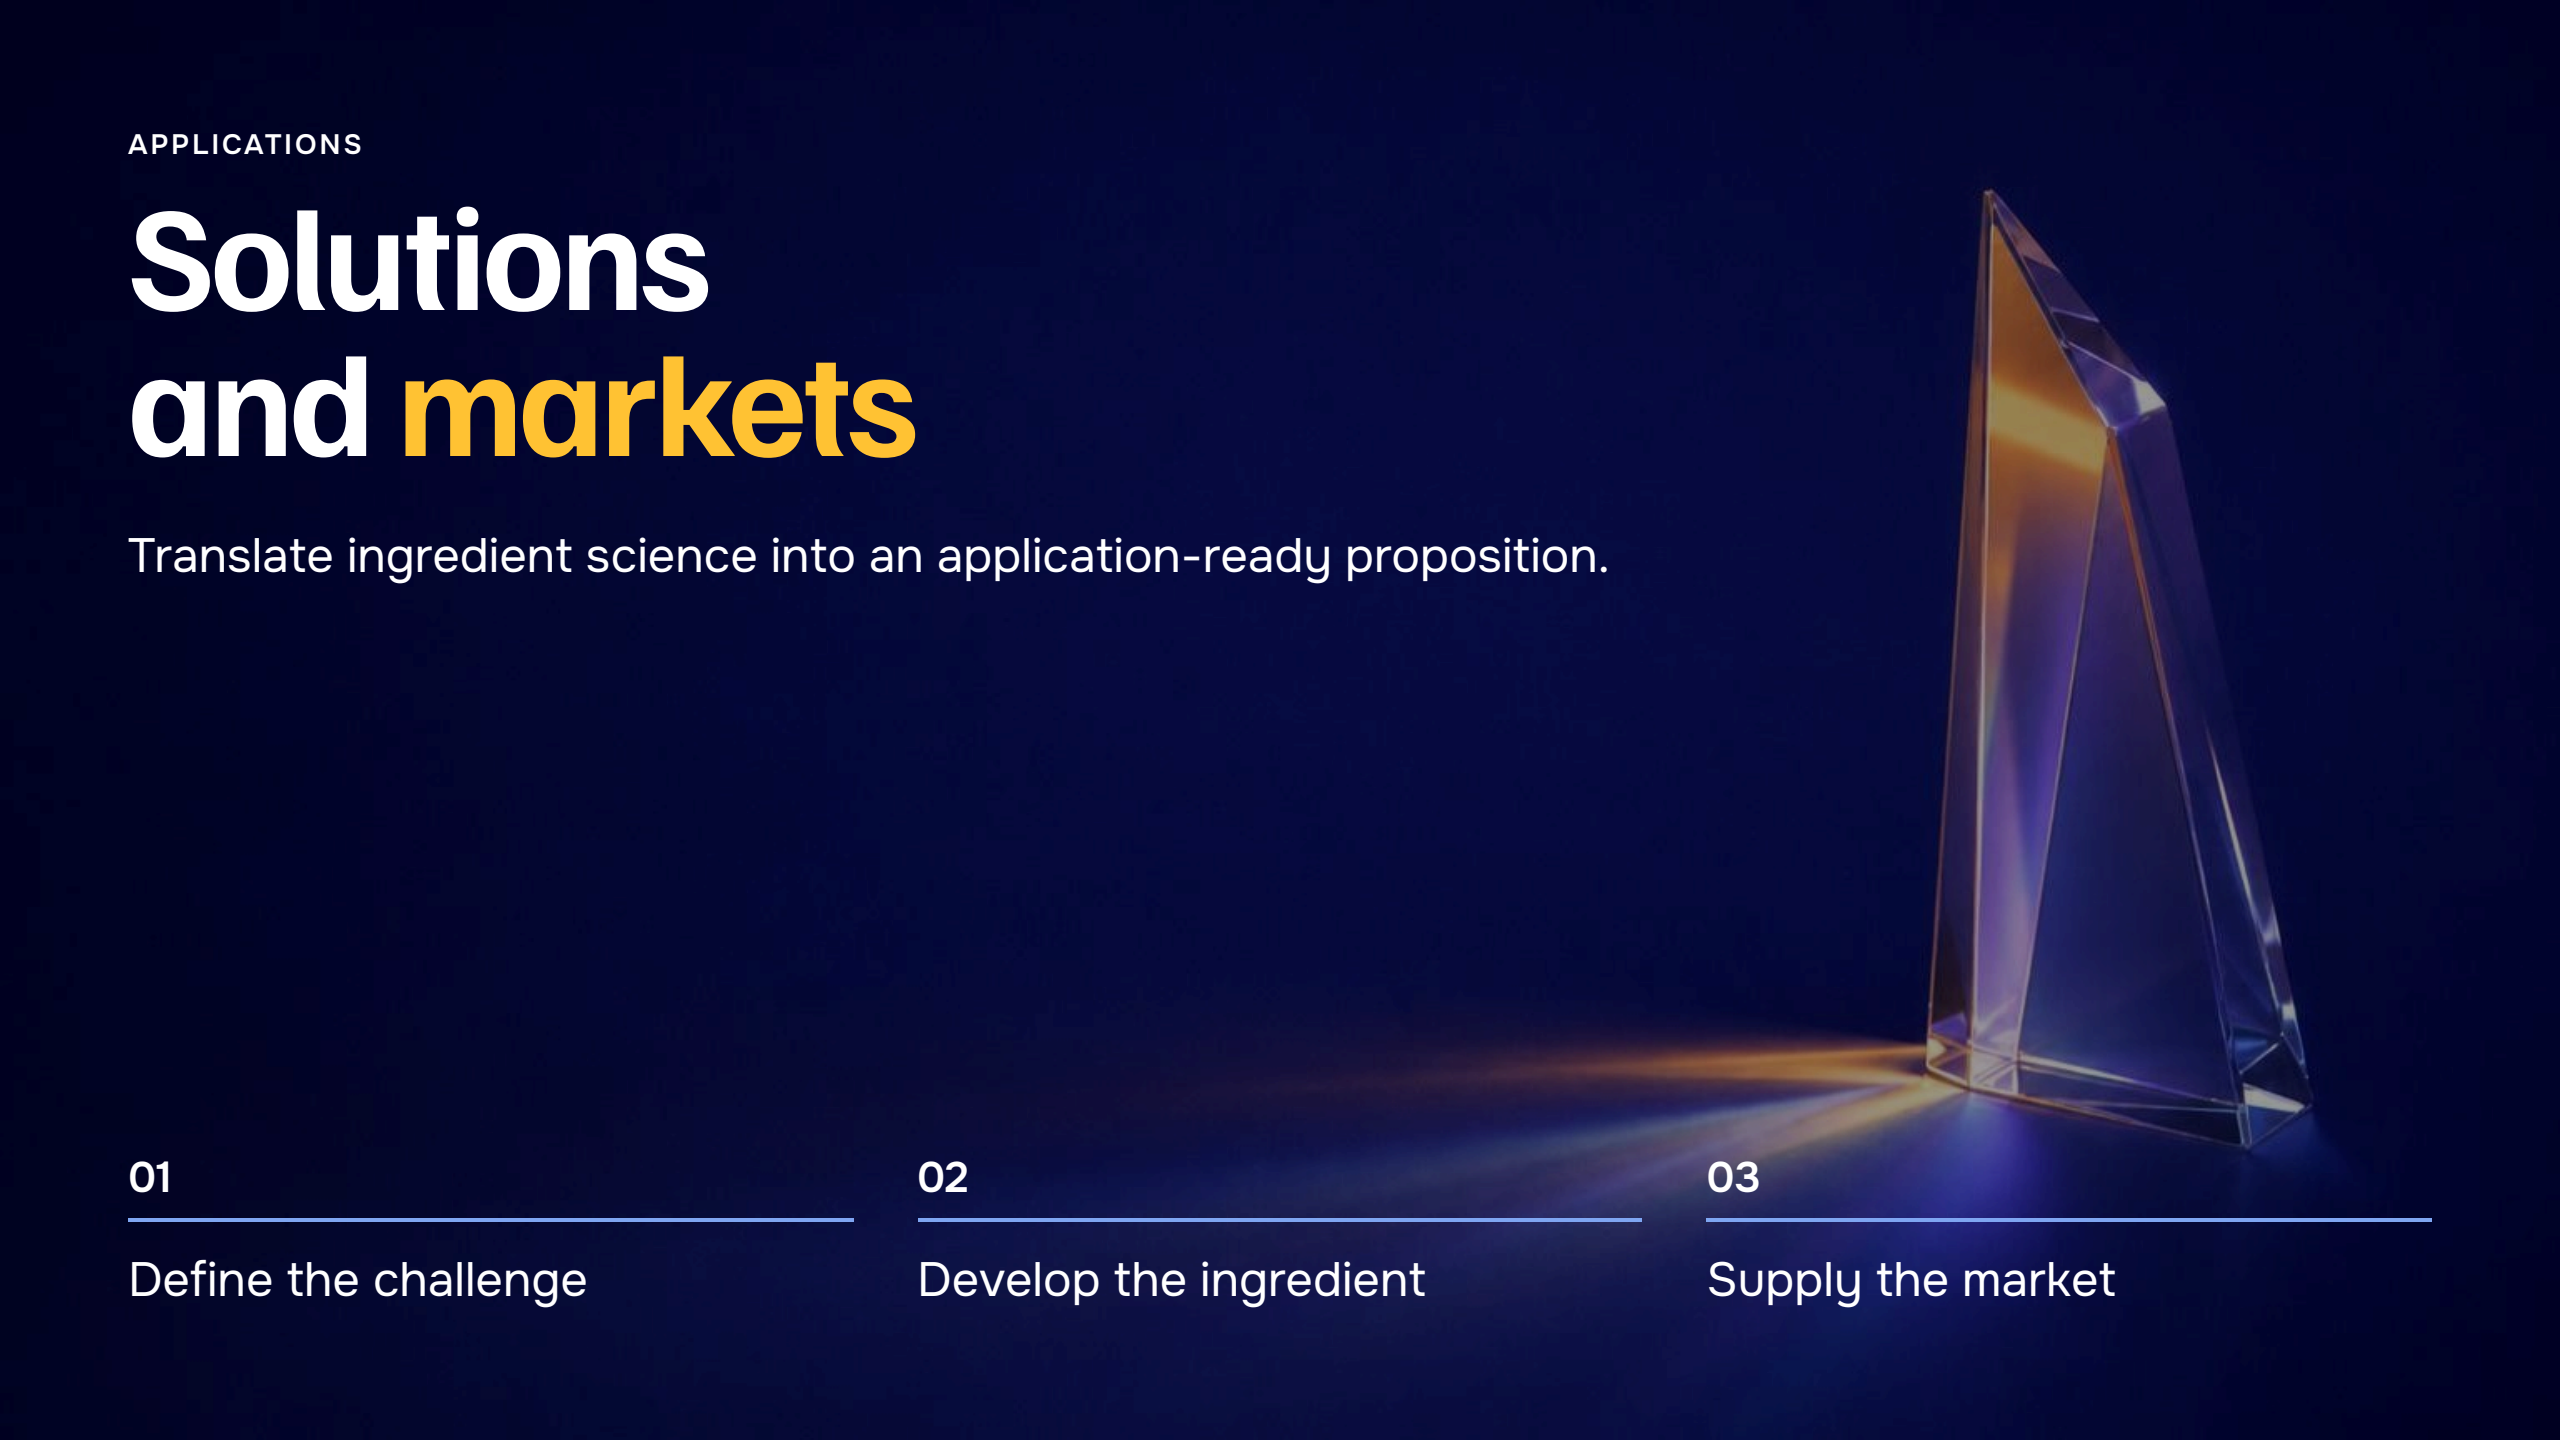

Prepared for each destination market.

APPLICATIONS

Solutions and markets

Translate ingredient science into an application-ready proposition.

01

Define the challenge

02

Develop the ingredient

03

Supply the market

REFORMULATION PRIORITIES

Solving the industry's toughest reformulation challenges

Food safety and longer shelf life

Address preservation needs in the finished application.

Replacing synthetic preservatives; sodium reduction

Reformulate with functionality in view.

Cocoa and its technological substitutes

Explore ingredient alternatives for formulation needs.

Clean label and regulatory compliance

Consider labeling and market requirements together.

APPLICATION BREADTH

One platform, many industries

Food and nutrition

Food, nutraceuticals and baby food.

Animal nutrition

Feed and animal nutrition, including the SANIFEED™ line.

Personal care and health

Cosmetics and women's health.

Industrial applications

Textile, chemicals, colors and flavors.

BRANDS AND APPLICATIONS

A brand portfolio built on science

FOOD PRESERVATION

PRESERFOOD™

For preservation across meat, dairy and egg.

SAFETY AND ANIMAL HEALTH

LYSOMAX™, ACARISIN™ and KNAMAX™

Portfolio solutions for safety and animal health.

SUPPLEMENTS

GLUCARYS™

A mineral and vitamin range for supplements.

FUNCTIONAL INGREDIENTS

OLEOSOL™

Part of a broader functional ingredient portfolio.

MARKET READINESS

Regulatory confidence in every market

Documentation follows the application and the destination.

Claims support

Support for nutrition and health claims under the EU authorized list.

Connect intended positioning with the applicable claims framework.

EU alignment

Aligned with Regulation (EC) 178/2002 and Regulation (EU) 1169/2011.

Food law and food information inform the route to market.

Destination documentation

Documentation managed by application and destination market.

Keep requirements specific to the product and its market.

COMMERCIAL FOOTPRINT

A global reach with a European core

500+

Clients in more than 50 countries.

EU focus, international logistics

A European base supports international commercial relationships and shipments.

Business-to-business only
Distributors, manufacturers and professionals.

PARTNER PROPOSITION

Why partner with Intabiotech

Scientific depth and commercial continuity in one relationship.

Science-led ingredients

Backed by in-house R&D and lab validation.

Evaluate ingredient choices against the demands of the application.

One partner from design to supply

Connect concept development, formulation, validation and delivery.

Keep the technical and supply conversation together.

Regulatory know-how

Support for faster market access.

Bring destination requirements into the development conversation early.

START WITH YOUR APPLICATION

Let's build your next product together

Tell us your challenge: shelf life, reformulation or a new ingredient.
