*Updated: April 2026*

# 1. Corporate Profile

INTABIOTECH, S.L. is a global biotechnology, food and chemical company, specialising in R&D&I and sourcing & supply, with a focus on measurable solutions for processes and product categories. The company defines its core activity as translating scientific, technical and regulatory knowledge into applied solutions for industrial clients. Its operational focus combines research, formulation, ingredient supply and biotechnology solutions, with a particular presence in food, animal feed and nutritional supplementation, without being limited exclusively to those sectors.

The corporate environment extends its reach to fine chemicals, biochemistry, research, textiles, additives and specialised ingredients, configuring a model of a science-based company with a high capacity for transfer into adjacent sectors where there is chemical or functional fit.

## Company Quick Facts

**Legal name:** INTABIOTECH SOCIEDAD LIMITADA

**Registered office:** C/ Botiguers, 3, 1<sup>a</sup> Planta, 46980 Paterna, Valencia

**Industrial base:** Avda. Ferreiros, 143, P.I. Río do Pozo, 15578 Narón, A Coruña

**Contact:** [intabiotech@intabiotech.com](mailto:intabiotech@intabiotech.com) · +34 881 092 720 · +34 613 812 425

## Mission and Positioning

INTABIOTECH's corporate mission is to transform scientific and regulatory knowledge into solutions that make products safer, healthier and more competitive, whilst remaining attentive to the realities of day-to-day industrial operations. This positioning places the company not merely as a supplier, but as a technical partner for development, validation and support.

The company expressly highlights a structure of **scientific, commercial, management, regulatory and legal back office under one roof**, with the aim of reducing friction in projects where technical implementation and documentary compliance are as important as the raw material itself.

### Research Pipeline

Developing New Therapies

Strategic Research & Development

Timeline: 2020 - 2025

Phase	2020	2021	2022	2023	2024	2025
Phase 1	0	10	20	30	40	50
Phase 2	0	0	0	0	0	0
Phase 3	0	0	0	0	0	0

## 2. Business Model and Operational Capabilities

The model the company has adopted and maintains combines vertically integrated R&D&I, formulation, manufacturing supported by industrial partners, global sourcing and international logistics services.

The corporate website highlights a network of more than 34 industrial partners and the capacity to source virtually any raw material, ingredient or substance on a global scale, as well as deliver solutions across five continents.

# 3.000

### Stock References

Semi-permanent in fine chemicals and specialised ingredients.

# 5

### Continents

Presence and service capability on an international scale.

# +34

### Industrial Partners

Network of manufacturing, technical support and approved supply.

# 24h

### Shipping Capacity

For certain references and destinations, subject to conditions.

## Key Business Capabilities

### Comprehensive Technical Liaison

Translating technical needs into value propositions that are clear for plant, procurement, quality and management. Coordinating projects between suppliers, plants, clients and internal functions.

### Development and Innovation

Development of new preservative technologies, food safety systems, speciality and functional ingredients, as well as the conceptualisation of flavour enhancers and bioavailability solutions.

### Global Sourcing & Supply

Supply of raw materials, ingredients and specialised substances for multiple sectors, with global sourcing capability and international delivery.

### Legal and Regulatory Support

Support with claims, labelling, traceability and the general framework of documentary compliance in innovative projects, integrated within the same operating structure.

# 3. Markets and Sector Coverage

INTABIOTECH's public architecture shows a broad and structured sector portfolio. In the food sector, the emphasis is on **functional ingredients, food safety, flavours, colours, supplements, plant extracts, cocoa and advanced reformulation**. This is complemented by markets in **animal nutrition, fine chemicals and biochemistry, cosmetics, textiles, olive processing, women's health and other industrial applications**. This establishes a technology-based company (TBC) model, with a high degree of specialisation in key sectors such as food and biotechnology, but with the capacity to transfer into adjacent sectors where there is chemical, biopharmaceutical, R&D or functional fit.

## Food and Beverages

- Food Safety Innovations
- Colours & Flavours
- SuperNatural
- Nutraceuticals
- Baby Food
- Cocoa & Cocoa Solutions
- Plant Extracts
- Sodium Reduction
- Sports Nutrition

## Feed and Animal Nutrition

Ingredients, additives and technical solutions for feed and animal nutrition.

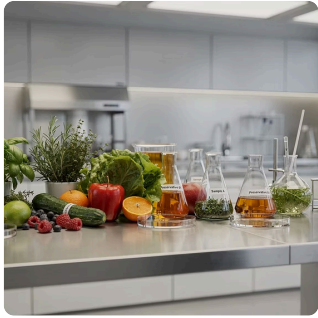

## Other Industrial Sectors

- Fine chemicals and biochemistry
- Cosmetics and functional ingredients
- Textiles
- Women's Health
- Olive processing
- Building / coatings / construction
- Energy / personal care
- Laboratory research

 The international section broadens the focus to building, coatings, construction, energy, food and beverage, personal care and laboratory research, reinforcing the company's global reach.

# 4. Platforms and Solution Families

INTABIOTECH's corporate dossier communicates not only a list of products, but **solution platforms** with their own identity. Based on the structure of the website, several high-value commercial and technical families can be distinguished, which shape the company's corporate narrative and its distinctive positioning in the market.

## Food Safety Innovations

Natural preservation platform, shelf-life extension and natural antibacterial solutions under the "**Naturaleza & Tech**" philosophy.

- Antimicrobials and microbiological control
- Vegetable ferments and cultured sugars clean label
- Natural antioxidants for lipid oxidation
- Fresh keepers and shelf-life systems

## SuperNatural

New generation of **100% natural** colours and flavours based on optimised and fermented plant and botanical extracts of intracellular origin.

- Replacement for artificial colourings and aromas
- Clean label, plant-based and sustainable positioning
- Formats: liquids, powders and dispersibles
- Stability for pasteurisation, UHT, baking and freezing

## Colors & Flavors

Division for the food, beverage, nutraceutical and oral care industries, with customised formulations and advanced technology.

- Powder, encapsulated, freeze-dried, liquid and emulsion
- Extraction with supercritical CO<sub>2</sub>
- Natural and vegetarian reaction flavours
- Colour blends for diverse industrial needs

## Proprietary Brand Portfolio

The company's public information shows its own and speciality portfolio, including references such as **ACARISIN™, ACETIPRO™, BICARPLUS™, BINDERMEAT™, ECO-EFF™, FIBERPLUS™, LYSOMAX™, MALTOLAN™ DRM, MAYOPOWDER™, PRESERFOOD™, PROTEOMEAT™, PROTEOSOL™, PURE-NATURE™, SoICel™** and **X-FRESH**, among more than 300 proprietary brands and developments. From a commercial perspective, this range reinforces the image of a company with conceptual ownership and technical differentiation, rather than merely generic trading.

# 5. Quality, Regulation and Compliance

One of the distinctive pillars that INTABIOTECH highlights is the **integration of science, industry and regulation**. The corporate website presents the legal and regulatory department as one of the company's core pillars and specifies support with claims, labelling, general regulatory frameworks and documentary support in innovative projects. In parallel, the certificates and registrations section conveys a clear message of quality control and traceability based on the homologation of industrial partners, documentation by material and relevant system certifications for the sectors served.

## Quality · Distribution and APIs

Quality certification for the commercialisation and distribution of chemicals, food products and APIs. Associated plants with ISO 9001:2015, ISO 14000, ISO 22000, FAMI-QS, HALAL and KOSHER, as applicable to each production centre and associated factory.

## RGSEAA · EU Sanitary Registration

RGSEAA N° 40/072570/C. Registration as an operator within the framework of European sanitary regulations for the commercialisation of food ingredients and additives.

## FDA · USA Registration

FDA Registration N° 11014242610 for food facilities. This enables operations with North American clients and markets under the FDA regulatory framework.

## SILUM · Animal Feed

Registration with the Ministry of Agriculture, Fisheries and Food for animal feed: ESP46199918. Importers of vegetable raw materials N° 15/1/03465.

## Food Industry · Xunta de Galicia

Industrial registration as a food industry with the Xunta de Galicia and authorisation for wholesale trade in industrial chemicals and fine chemicals.

## Ethics and Corporate Responsibility

The Ethics & CSR section incorporates the CEO's message: *"Innovation is an act of responsibility."* Integrity as a distinctive factor and a code of conduct as cultural DNA, not as a formality.

Year 2019

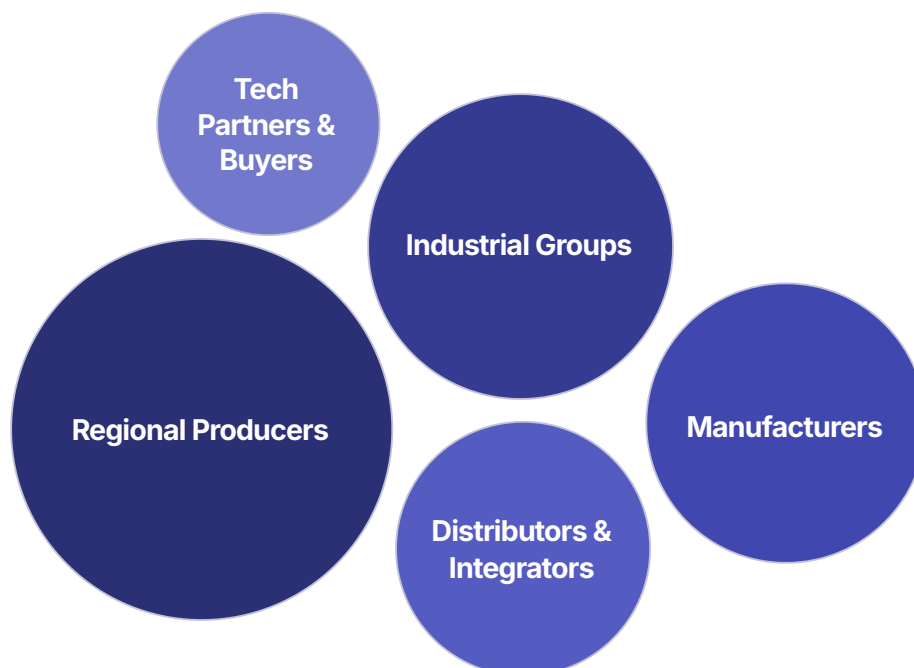

# 6. Corporate Value Proposition

From a commercial perspective, INTABIOTECH can be presented as a company that integrates **four capabilities into a single relational platform**: technical expertise, development capability, regulatory support, and real access to manufacturing and supply. The value proposition should be framed around this combination, rather than as a mere collection of catalogue references. This integration is especially relevant for industrial clients who need a single interlocutor capable of supporting the full development cycle, from conceptualisation through to documentary compliance.

The client profile ranges from **regional producers to large industrial groups**. In business terms, this means the dossier can be used both for commercial prospecting of manufacturers and for distributors, integrators, technology partners, and buyers of speciality ingredients.

# Reasons to Work with INTABIOTECH

## → **Technical Interface with Industry Language**

Formulation, process, stability, cost and compliance. The ability to speak with plant, purchasing, quality and management in the same technical language.

## → **Tailor-Made Development**

Capability for customised development rather than simply selling standard references. A bridge between applied science and the productive reality of the plant.

## → **End-to-End Coverage**

From the ingredient through to the associated documentation, including sourcing, formulation, manufacturing and regulatory support in a single commercial relationship.

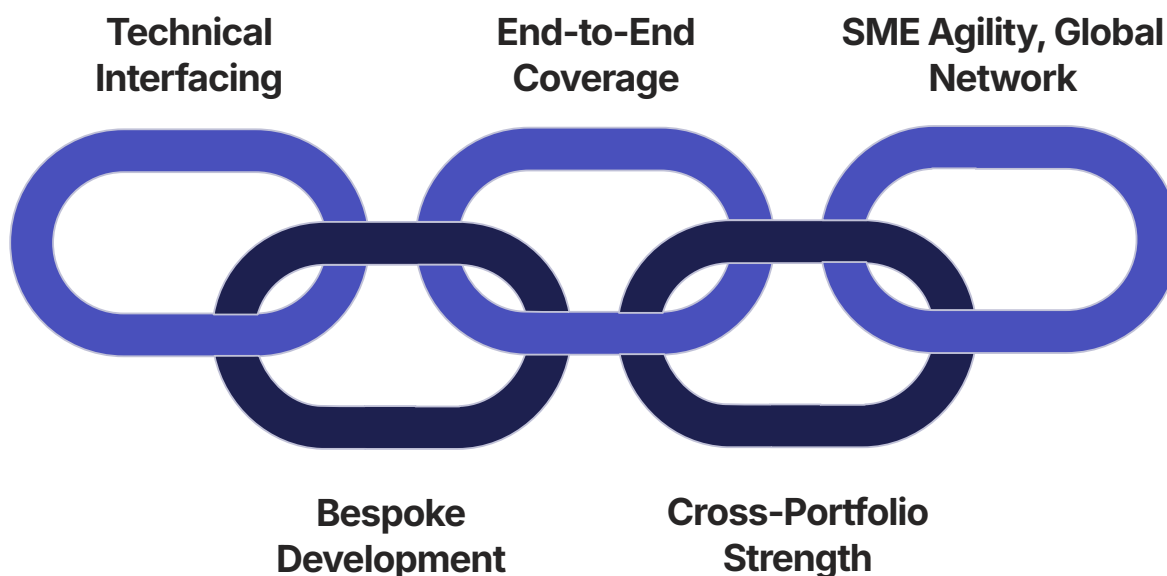

## → **Cross-Sector Portfolio with Distinctive Strength**

Particular strength in food safety, functional ingredients, natural solutions and specialised chemistry, with proprietary platforms offering high added value.

## → **SME Flexibility with an International Network**

Agile and close-knit structure with a network of more than 34 international industrial partners, combining the responsiveness of an SME with the global reach of a specialist operator.

### INTABIOTECH Network

# We lead. We do not follow.

You choose us for our vision.

You trust our quality.

You expect technical, scientific and regulatory rigor.

You value applied innovation and execution capability.

INTABIOTECH stays ahead, turning knowledge into real solutions for industry.

## INTABIOTECH. At the forefront.

Much more than a supplier:  
a strategic partner.

### Committed to industrial progress.

We develop and supply functional ingredients, biotechnological solutions and tailor-made projects for food, nutraceuticals, chemicals, biopharma, textiles and other sectors. Our strength combines R&D+i, formulation, manufacturing, sourcing & supply, and technical-legal-regulatory support under one roof.

# 7. Message, Mission, Vision and Values

## Responsibility

We are wise and experienced, but we take responsibility for any error or necessary change in our processes. Through continuous improvement and accountability, we constantly strive to progress every day.

## Profitable

Our solutions are designed to be profitable both for us and for our clients. By focusing on our core values, we create an environment in which both parties can achieve lucrative results. Collaborative teamwork generates greater profitability.

## Reliable

A large part of our business relationships is based on technology. We are a trusted partner and you can rely on us to keep your information confidential.

### **Ethics and morals**

We operate in an ethical and moral business environment. Our ethics encompass diversity, respect and courtesy. Our moral principles include acting with integrity, treating others fairly and being loyal to our clients.

### **Teamwork**

Internally, we always work together to achieve our common objectives. This collaboration extends beyond the boundaries of our company and includes our clients, who are integrated into our team. We strive to ensure that each business relationship is beneficial to both parties.

### **Accredited**

We safeguard our reputation through a policy of strict compliance and adherence to current laws and regulations. We are therefore proud of our legal and regulatory team, which operates at national, European and international levels.

**INTABIOTECH's commercial process follows a logic of progressive added value: first, the customer's genuine need is diagnosed with technical and regulatory criteria, then a viable route is designed, and finally the complete solution is delivered with continuous support.**

“  
INTABIOTECH turns science, regulation and industrial capability into applicable solutions for clients who need measurable results.  
”

“  
We do not merely supply ingredients: we design viable technical and commercial routes to reformulate, protect, differentiate and scale products.  
”

“  
Our proposition brings together R&D+i, global sourcing, documentary compliance and close support in a single service platform.  
”

“  
We work from Spain for clients and projects internationally, with a focus on useful naturalness, safety, functionality and industrial competitiveness.  
”
